BWSC biomass plant awarded

Local Authority Building Excellence 2009

Burmeister & Wain Scandinavian Contractor A/S' (BWSC) biomass plant, Western Wood power plant, in Wales has recently been awarded "Building Excellence 2009".

The award was handed over to the consortium partners, BWSC and Aalborg Energie Technik (AET), on January 27th, 2009 by Neath Port Talbot County Borough Council, Wales.

The determination of the award was based upon a wide range of criteria rewarding good building practice, amongst others:

- Workmanship
- Quality control
- Site environment
- Health & Safety
- Provisions for disabled people

Having received the local authority building excellence award, the Western Wood biomass plant will progress to the South Wales regional building excellence award competition later in the year.

"We are very proud to have been associated with this award in relation to the Western Wood biomass project which is the first biomass-fired power plant in Wales. This award signifies not only local recognition of our project but also a step ahead for Wales towards a future where renewable energy sources will be the contributing factor to continued growth and prosperity", says Executive Director Søren Barkholt.
