

TURBOCHARGER SERVICES

TURBOCHARGER SERVICES

With a conveniently located, fully-equipped workshop and a two-dozen strong organisation of craftsmen, specialists and engineers, BWSC Panama S.A. is able to provide a variety of services to fleet operators with frequent canal crossings.

Among the vital services readily available through BWSC Panama S.A. is field and workshop services of turbocharger cartridges of all makes and sizes. Our factory trained staff holds a number of OEM licenses and our location, facility and logistical set-up ensures that on-board service can be quickly mobilised.

Examples of workshop services:

- dynamic balancing of rotors and shafts
- cleaning and handling in accordance with OEM recommendations
- complete reconditioning of core components of all makes and sizes
- fully outrigged shop manned by field service experts, craftsmen and specialized factory trained staff
- emergency response service, on-board with-in hours (subject to a vessel's specific location)

Turbocharger services may be based upon time and material service rates, or on individually designed lump sum turnkey contracts based on the client's preferences. Long-term service agreements designed individually to meet the client's specific demands are naturally also available. BWSC Panama S.A. is but a phone-call away.

Additional services provided by BWSC Panama S.A.:

- major engine overhaul services during regional port calls and scheduled docking
- pre-docking surveys
- engine room auxiliary system services
- expanded workshop facility services (rotating components maintenance, remote stock and supply, etc.)
- local OEM and supplier networking, logistic support, etc.
- assistance during classification of component by class surveyors
